

## Split Heart

Needed: 10" square of black, 10" square of pink

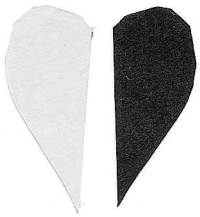

The heart template does not include seam allowance. Make allowances if you are choosing to do a turned under edge on your appliqué.

Place squares, right sides together, with black on the bottom. Cut on the diagonal.

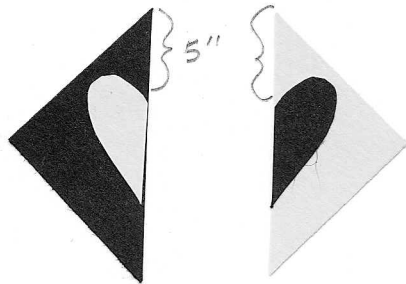

Set aside the pair of triangles on the left. These will be your background pieces.

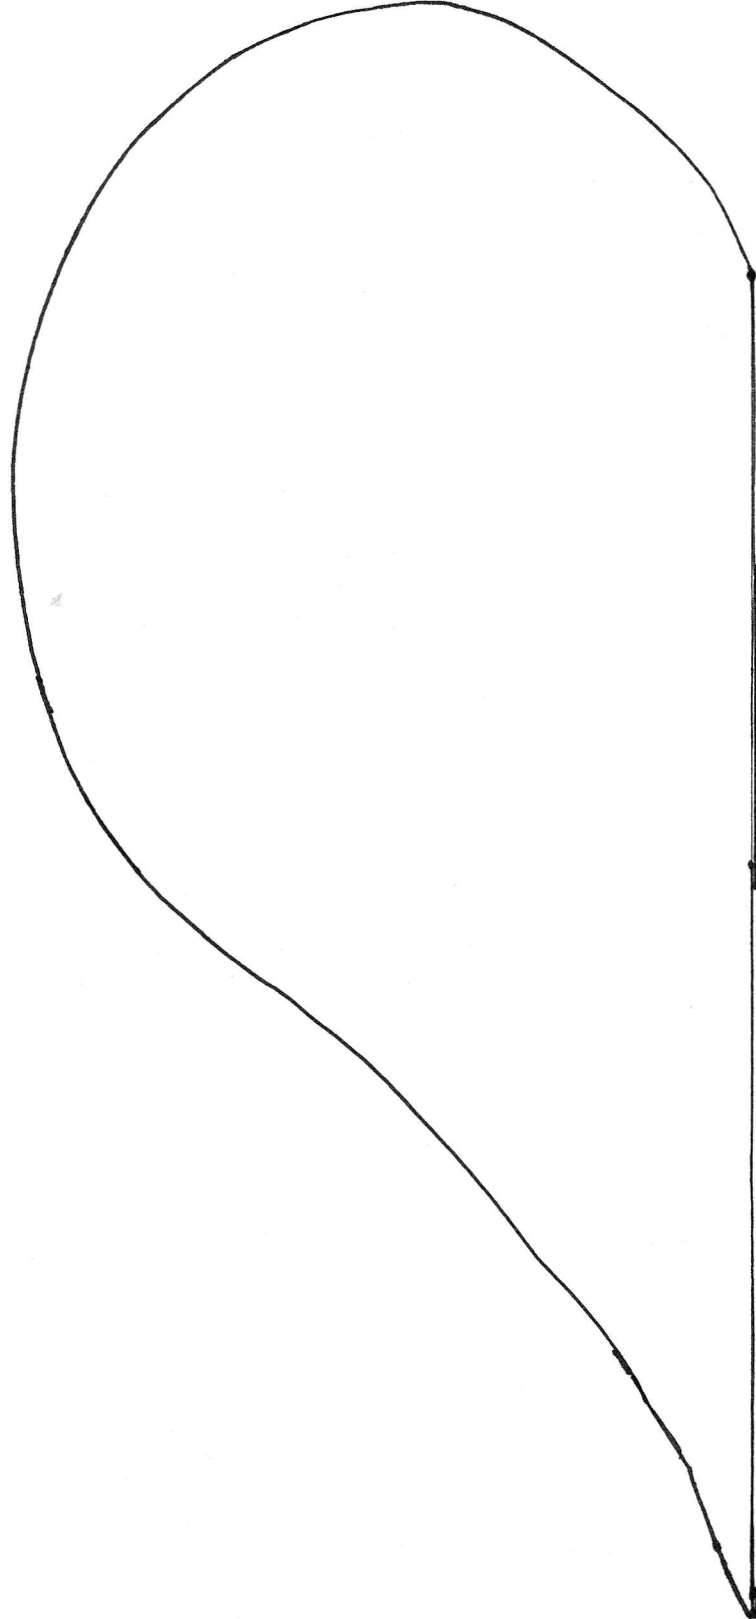

Cut your heart shapes from the triangle pieces on the right. The position of your template depends on your method of appliqué. The finished pieces should look like this:

Place the crevice of the heart 5" from the tip of the triangle.

With right sides together, sew your seam through all layers. Press towards the black. Finish the edge of the heart with whatever method you choose. Do not leave raw edges exposed. Square up to 9  $\frac{1}{2}$ ".

Reverse for opposite  
side of heart.
